

Problem #11 – Gummie Bears

A bin at a candy store contains 1800 gummie bears. The bin only contains three colors, red, green, and yellow with 65 percent being red and 15 percent being green. You walk into the store and purchase only red gummie bears out of the bin. Now, only 55 percent of the gummie bears are red in the bin.

How many gummie bears of each color are in the bin after your purchase?

Due date: Friday, Dec. 9th, 2011
